

AIA/CES Registered Provider Program Summary

The American Institute of Architects
Continuing Education Systems
AIA/CES Registered Provider Program
Summary Handout

Provider Name: David Long, Staticworx

Program Title: Anti Static Flooring: The Basics

Length: 1

Credits: 1 (Learning Units)

HSW: No (Yes or No)

Program Overview:

Understand how anti static flooring including how it works, how it limits the risks of static shock to sensitive electronics in applications ranging from networked offices, to 24/7/365 call centers, to medical settings, cleanrooms, and more.

Learning Objectives: Performance to be completed, under what condition, and against what criterion?

- Minimize the risk of electro-static discharge through proper specification of static control flooring based on the application and specific risks posed in a given environment
- Assess the installation environment by utilizing static control international test methods and conventional industry measurement instruments
- Meet standards (including ANSI/ESD S-20.20, AATCC134, and NFPA99) when selecting static control flooring

Facilitator Qualifications:

David Long, 30+ years ESD industry and published author for vetted industry publications
